Incident management and response policy	06 - Incident Response Policy.pdf
Vulnerability management procedures	07 - Vulnerability Management Procedures.pdf
Infrastructure/dependency management policy	08 - Infrastructure Dependency Management Policy.pdf
TLS 1.2 or higher evidence	09 - TLS 1.2 Evidence.pdf

Technical Design Summary to Paste Into Zoom

Room Clarity is served at <https://roomclarity.com> and supports TLS 1.2 or higher. The app follows a documented SSDLC, runs CodeQL SAST and OWASP ZAP DAST scans through GitHub Actions, and maintains supporting privacy and security policies. Zoom webhook events are verified using HMAC signatures and timestamp freshness checks. Meeting dashboard access uses scoped access tokens, and service-admin inspection routes require an admin token. Please see the attached PDFs named by requirement.
